SUMMARY

Frontend Engineer with 3 years of professional experience delivering responsive and scalable web applications using **React**, **Next.js**, and **TypeScript**. Proven ability to implement end-to-end frontend features, manage complex state, integrate APIs, and maintain clean, maintainable codebases. Experienced in collaborating with product and backend teams in agile startup environments to ship reliable, user-focused features.

WORK EXPERIENCE

Chainfore

Apr 2025 - Dec 2025

Frontend Product Engineer (on-site)

Lahore, Punjab, Pakistan

- Took **end-to-end ownership of core frontend features** for *Auxee*, an AI platform that enables teams to design, configure, and iterate on AI agents using modular workflows and natural-language instructions.
- Led the **implementation of complex user flows** for agent creation, prompt configuration, and workflow orchestration, working closely with product, design, and backend teams to translate requirements into production-ready features.
- Architected and maintained a **scalable frontend component system** using **Next.js**, **TypeScript**, **Material UI**, and **styled-components**, ensuring consistency, reusability, and long-term maintainability across the product.
- Built **performance-optimized, SEO-friendly interfaces**, improving initial load times, navigation responsiveness, and overall application reliability in a fast-iterating startup environment.
- Actively **identified, debugged, and resolved 200+ UI and logic issues**, significantly improving product stability, cross-browser compatibility, and user experience.
- Played a key role in **product iteration and refinement**, proactively suggesting UX and technical improvements to reduce friction and improve usability for non-technical users interacting with AI workflows.

CWN(code with naqvi)

Sep 2022 - Dec 2024

Frontend Developer (remote)

Lahore, Punjab, Pakistan

- * Contributed to the development of **5+ production web applications**, taking responsibility for implementing frontend features from design handoff to final delivery under remote collaboration workflows.
- * Built and maintained **responsive, performance-focused UI components**, ensuring cross-browser compatibility and consistent behavior across devices.
- * Worked closely with designers and backend engineers to **translate requirements into functional user interfaces**, gaining hands-on experience integrating frontend logic with **Node.js**, **Laravel (PHP)**, and **Python-based backends**.
- * Gradually took ownership of **larger and more complex features**, moving beyond small UI tasks to complete screens and feature flows as experience grew.
- * Participated in **code reviews and refactoring efforts**, improving code readability, maintainability, and adherence to team standards.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Frontend Frameworks: React, Next.js

State Management: Redux, Context API

Styling & UI: HTML5, CSS3, Tailwind CSS, Material UI, styled-components, CSS Modules, Bootstrap

Web Fundamentals: Responsive Design, Accessibility (basic a11y practices)

APIs & Data: GraphQL, SQL

Tools & Workflow: Git, GitHub

PROJECTS

- **Auxee – Collaborative AI Agent Builder**
Overview: Contributed to the front-end development of Auxee that enables teams to design, test, and deploy AI agents collaboratively. The system allows users to visually compose agent workflows, define tasks using natural language, and integrate APIs, tools, and datasets.
Tech Stack: Next.js, TypeScript, Material UI, styled-components, Node js
- **SafeHerit: Asset Handoff System with Death Confirmation**
Overview: Developed a secure web application that ensures user assets are transferred to beneficiaries after death, verified through a validator network.
Tech Stack: HTML, CSS, Tailwind, React Typescript, Node JS
- **Ocean Mist VSCode Theme**
Overview: Ocean Mist is a modern VS Code theme inspired by the calming aqua color, designed for readability and focus.
